DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to a method of producing hydrogen from solid carbon materials and feed water, classified in class 204, subclass 164.
 - II. Claims 4 and 5, drawn to a hydrogen production system, classified in class 422, subclass 186.04.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed could be used to practice another materially different process such as vacuum arc plasma sputtering to form a protective hydrocarbon layer onto a substrate.
3. A telephone call was made to Frank Jordan on May 24, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
